

JDialog

```
classDiagram
    class JDialog
    class com_activitytracker_CreateUserWindow["com.activitytracker.CreateUserWindow"]
    com_activitytracker_CreateUserWindow --|> JDialog
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'JDialog'. Below it is a larger box labeled 'com.activitytracker.CreateUserWindow'. A blue arrow points from the bottom of the 'com.activitytracker.CreateUserWindow' box up to the bottom of the 'JDialog' box, indicating that 'com.activitytracker.CreateUserWindow' inherits from 'JDialog'.
