

JDialog

```
classDiagram
    class JDialog
    class CreateUserWindow["com.activitytracker.Create\nUserWindow"]
    CreateUserWindow --|> JDialog
```

The diagram illustrates a class relationship. At the top is a box labeled 'JDialog'. Below it is a larger box labeled 'com.activitytracker.Create\nUserWindow'. A blue arrow points from the bottom of the lower box to the bottom of the upper box, indicating that 'com.activitytracker.Create\nUserWindow' inherits from or is a specialization of 'JDialog'.

com.activitytracker.Create  
UserWindow
