Import Data Use Case

Name
Import Data

Description
Allow user to import workout data from text file into the application.

Actors
User, application

Flow
The user will be able to click the "import data" button. An "upload file" window will appear, where the user will be able to select the desired text file to upload. The user will then click the "OK" button, which will confirm their file selection and cause the application to start importing the data from the text file.

Alternate Flow
    a) If the user does not have an account, the "upload file" button will not appear
    b) If the user attempts to upload a non-text file, the system will display an error
    c) If the selected text file does not have information in the desired format, the application will not be able to extract the data.

Preconditions
    1) The user has the application installed
    2) The user has an account on the application
    3) The user has data on a text file to import

Postcondition
The user will have imported their workout data into the application.
